

Hurricane Fence Company is a growing service and installation company for gated communities, commercial properties and industrial sites in the Richmond, VA and surrounding area. Hurricane Fence has been in business since 1994 and is A+ rated by the BBB.

Who we are looking to hire

The ideal candidate is a professional technician who lives within our service area. Has at least 3-years of experience in the same position and is not afraid to get their hands dirty by digging holes, trenches, installing conduit and using construction tools outdoors in all weather climates.

What to expect working at Hurricane Fence Company

An average day is be ready-to-go at our office in Richmond, VA at 8:00am, Monday through Friday. We have a brief meeting to receive each person's work tickets, then use the company vans/trucks to either perform services on existing systems or installations of new systems. HF provides personal protective equipment, work shirts, hats, fully stocked work trucks with power tools, service supplies and installation materials. *The technician is required to supply their own pants, steel toed boots, hand tools and maintain a valid driver's license and clean drivers record.* As a technician completes a service or project each day, they will write a service ticket. The service ticket documents what the technician accomplished, and is how we invoice our clients. The Technician will also document their own time card each day, as this is how we pay the technicians on a weekly basis. *Another requirement is the technicians must have legible handwriting and must be able to communicate in English.*

Ideally, the technicians try to find a good stopping point on the job-site by 4pm. But due to the nature of the business a good stopping point may not be until after 4pm. Each technician works an average of 45 hours per week and receives Overtime each week. This position will have some out of state travel a few times a year with all the expenses paid for by HF plus per diem.
